Problem solving 6*

EXPERIENCE

Assistant system engineer	Tata Consultancy services	June 2019-Present

- Developing and supporting features for a consumer facing application in accordance with a BFSI client with a primary stack as AS400/RPG.
- Building automated transaction flows for Allianz Global & Specialty.
- Understanding and working with the product owners in a close quarter for delivering new business features.

Summer Trainee	Globsyn technologies	May 2018 – Jul 2019

- Implemented the material design 2.0 patterns to the existing prototype.
- Created an api for fetching records through firestore with optimized latency.

EDUCATION

GCETTS

	M.A.K.A.U.T	May 2015 – Aug 2019

- B.Tech. in Computer science and engineering, GPA: 8.74

PERSONAL PROJECTS

- **Covid19 tracker:** A web application build with React and disease.sh, for tracking the impact of the Covid virus on a global scale [React, Material UI, redux, leaflet, leaflet React,] (*GITHUB*)

- **Book Hub:** A consumer faced application that hosts used books by a user to be on sale, incorporating a clean production ready UI, location services, Firebase Auth as user authentication and email verification, Fire store as a no-sql database, and Firebase storage as blob storage
  [*Java, Material design 2.0, Firebase auth, Firestore, Firebase storage]* (**Github**)

- **Crown**: A fully functional React application to showcase my modern design principles in terms of an e-commerce product with multiple routes global state management and an end-to-end responsive design.[React.js, Node.js, , SCSS, Redux, Redux sagas, Firebase*, Stripe]* (*GITHUB,LIVE*)

- **Facebook-clone**: A functional React application to showcase my modern design principles in terms of a social networking product with multiple routes global state management and an end-to-end responsive design.[React.js, CSS, React-Context API, Firebase*]* (*GITHUB*)

- **Netflix-clone**: A web application build with React that mimics the functionality of Netflix with multiple routes global state management and an end-to-end responsive design.[React.js, CSS, Redux, Firebase*, Stripe]* (*GITHUB*)

Languages and Technologies

- **Programming languages**: Java, JavaScript (familiar), C++(familiar)
- **Technologies/Tools**: Android studio, VS Code, Firebase, Redux, React.js, Material design 2.0.

CERTIFICATIONS & TRAININGS

- Android development using Material design and Firebase, *[Globsyn technologies May 2018]*
